The ...After Method 'Research Methods': a compulsory course, which is loved by some but hated by many! This stimulating book is about what went wrong with 'research methods'. Its controversial argument is radical, even revolutionary. John Law argues that methods don't just describe social realities but also help to create them. John Law argues that methods don't just describe social realities but are also involved in creating them. The implications of this argument are highly significant. If this is the case, methods are always political, and it raises the question of what kinds of social realities we want to create. Most current methods look for clarity and precision.
