

Creo Parametric Assembly Drawings

Creo Parametric Assembly Drawings - This feature is not available right now. Please try again later. Creo Parametric associates drawings with their parent models. The model automatically reflects any dimensional changes that you make to a drawing. In addition, corresponding drawings also reflect any changes that you make to a model (such as the addition or deletion of features and dimensional changes) in Part, Sheetmetal, Assembly, or ...I'd like to get different drawings of a big assembly, these drawings don't match with the subassemblies contained on the assembly and I can't reorganize the assembly structure. I'd like to create different drawings, with different parts/subassemblies on each drawing, and see the BOM of the elements shown in the assembly...Making Assembly Drawings. This tutorial is part of a course. View the full course. Views 31251 Views Difficulty level Level: Advanced Duration Created by Mark Taddonio, This Creo Parametric tutorial will demonstrate how to create an assembly drawing complete with a bill of materials and corresponding balloons.
